

# What is High Performance Learning?

## **High Performance Learning *theory***

High Performance Learning (HPL) believes that no matter how well you are performing now, you can achieve the very best grades at the end.

In order to reach the very top, you need to work hard, ask for help when you need it, practice what you aren't as good at and, most importantly, believe that you can do it!

# What is it based on?

## Once clever always clever?

“ Contrary to popular belief, **gifted adults were seldom child prodigies.** ”

Benjamin Bloom (1982)

“ When cohorts of children are tested at a young age plus regularly retested over time, the scores show substantial year-to-year regression, disproving the **common myth that a child considered gifted at aged 6 would still be considered gifted at 16.** ”

”

Lohman and Korb (2006)

# NO...

# What is it based on?

High  
Performance  
Learning

## Can we get cleverer?

“When it comes to improving intelligence, many researchers concluded that it was not possible.

Our findings, however, clearly show that this is not the case. Our brain is more plastic than we think.”

Jaeggi (2008)

**YES**

# What is it based on?

“In a fixed mindset, people believe their basic qualities, like their intelligence or talent, are simply fixed traits.

In a growth mindset, people believe that their most basic abilities can be developed through dedication and hard work—brains and talent are just the starting point.”

## How does it work?

40 years of research into how the most able students think and learn, gave a set of characteristics shared by the highest performers

# How do High Performing Learners think?

ACPs

- Intellectual playfulness
- Flexible thinking
- Fluent thinking
- Originality
- Evolutionary or revolutionary thinking

Creating

- Meta-cognition
- Self-regulation
- Strategy planning
- Intellectual confidence

Meta-thinking

- Connection finding
- Generalisation
- Imagination
- 'Big picture' thinking
- Seeing alternative perspectives
- Abstraction

Linking

- Critical or logical thinking
- Precision
- Complex and multi-step problem solving

Analysing

- Automaticity
- Speed and accuracy

Realising

# These are not difficult, for example: metacognition

- ❑ Plan-think about the task before you start,
- ❑ Do it and think about how you are doing,
- ❑ Review, think about how you could do better next time

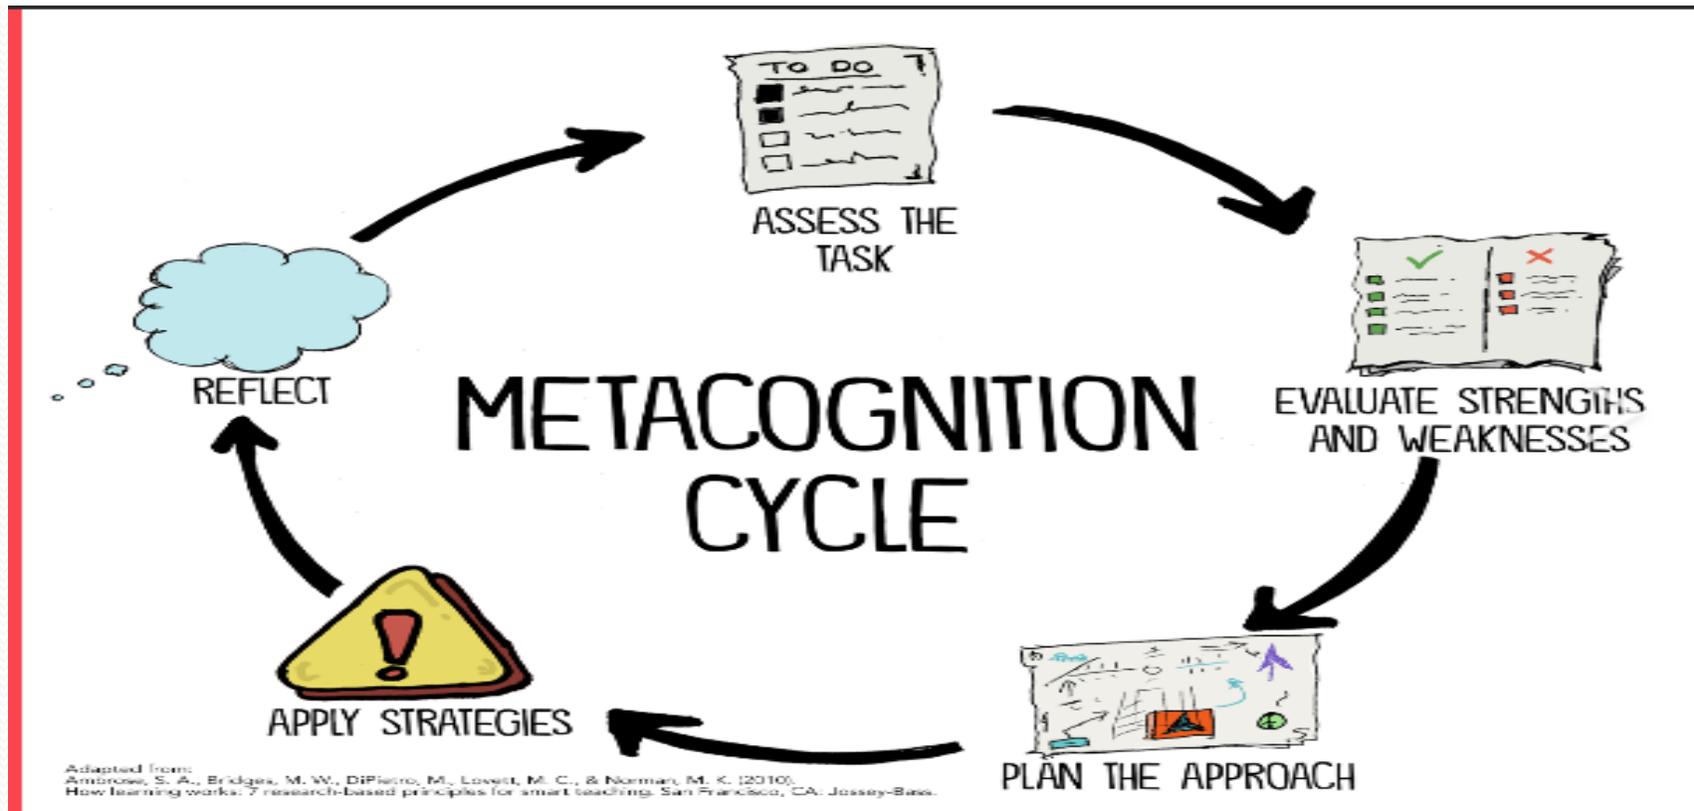

Image from John Spencer <http://www.spencerauthor.com/metacognition/>

# How do High Performing Learners behave?

VAAAs

- Collaborative
- Concerned for society
- Confident

**Empathetic**

- Enquiring
- Creative and enterprising
- Open-minded
- Risk-taking

**Agile**

- Practice
- Perseverance
- Resilience

**Hardworking**

Concerned for society: reverse advent calendar

## HIGH PERFORMANCE LEARNERS

# SAY...

- “How can I improve?”** — Instead of...  
“I’m no good at this.”
- “Let me try a different way.”** — Instead of...  
“I give up.”
- “Mistakes are part of learning”** — Instead of...  
“I failed.”
- “Have I done my best work?”** — Instead of...  
“I’m all done.”
- “Learning takes time.”** — Instead of...  
“This is too hard.”
- “How can we learn from one another?”** — Instead of...  
“They’re smarter than me.”
- “I like a challenge.”** — Instead of...  
“I’ll stick with what I know”
- “My effort and attitude are everything”** — Instead of...  
“My abilities determine everything”

# Most important is a growth mindset

# How can you be better?

## THE TRIPLE A OF LEARNING

by @inner\_drive | [www.innerdrive.co.uk](http://www.innerdrive.co.uk)

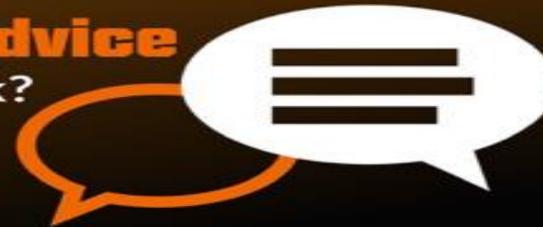

### **A**cknowledge Your Mistakes

Focus on what you could have done better (don't play "The Blame Game")

### **A**sk for Feedback and Advice

Who will give you useful feedback?  
Don't be shy, ask them.

### **A**ction the Feedback

It is not enough to know what you need to do, you also have to go out there and actually do it!
